

Grade 11 World History Summative Assignment:
Alexander the Great RE-CONQUERS THE WORLD

You may work **alone**, in **pairs**, or groups of **3 (THREE)**

You are Alexander the Great. You have been given a prophesy about your upcoming fortunes as you proceed to conquer an empire. You decide that, having been told what is actually going to happen to you, things should be done differently. Alexander died, worn out, at the age of 33...something you want to avoid at all costs.

Your job is to create a new plan of conquer the world, only this time, do it differently from Alexander's original path. You want to be more efficient, smarter...and you want to survive after all the fighting to rule your new world empire.

The presentation of this project must include the following:

- A large bristol board, or large 3-section presentation board, with the centerpiece being a large map of the world as Alexander would know it. This map will display the route YOU will take to conquer the world. You **MUST CONQUER EVERYTHING ALEXANDER CONQUERED -- HOWEVER**, you must take a different route than he did. You should then carve up the world as you see fit...into different zone/state/provinces, etc..., and even add new cities, or rename old ones;
- You must have **THREE (3)** to **FOUR (4)** smaller maps/diagrams, which will display battle plans and tactics of your choice -- these will display most, if not all, of the large battles mentioned below;
- You must complete a typed, double-spaced, 12 point font, report, outlining your new conquest route, plans of attack, and path to victory. This must primarily focus on the **FOUR (4) LARGEST campaigns** in which Alexander was involved:

***Granicus**

***Issus**

***Guagamela**

***Hydaspes**

Each report must outline your new plans of attack – how would you fight these battles differently from the originals in which Alexander took part? What new tactics and strategy would you use? How will your victory be more efficient on this occasion? You should aim for **TWO (2) to THREE (3) pages** (500-700 words) for each of these battles – include proper footnoting and bibliography format

- The report should also include a **NEW GOVERNMENT DESIGN** – your empire needs to be ruled effectively...how will you do it? What type of institutions will you create? This should be about **TWO (2) pages**, or 500 words;

OVERALL, there should be a combined TEN (10) to FIFTEEN (15) page report, outlining your campaign to conquer the world, which will be handed in along with your display/bristol board component

DUE DATE: _____
